

Endless Possibilities

Flipper Family of Products:

- Flipper
- FlipperPort
- Flipper Panel
- Flipper Stand

Optional configurations:

- Lightweight glasses allow you see sharp images, on your own built-in TVs with no reflection or glare (uses rechargeable batteries).
- Use with 12" LCD, which runs over 5 hours on a rechargeable battery.
- Desktop Stand extends the flexibility of Flipper and FlipperPort by elevating products so that users can view blackboards and presentations.

Flipper™

The Ultimate in Flexibility
— Just Point and See!

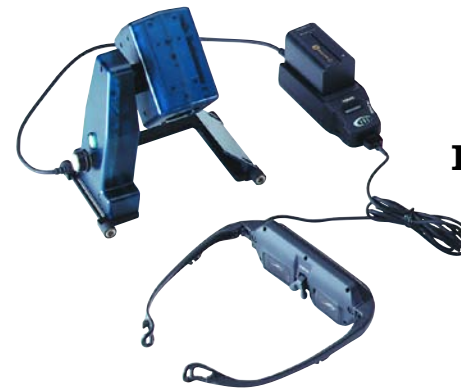

enhanced
vision

Near and distance viewing is made easy — at school, work, or home. Everything is within your reach with Flipper's innovative rotating camera. Connect Flipper to a pair of portable glasses or any TV or monitor, then roll and point at any object. With Flipper enjoy full-color, auto-focus magnification and multiple contrast options. Pair Flipper with the optional desktop stand and create a fully-functional desktop video magnifier with magnification up to 50x. This configuration allows you to easily view blackboards and presentations. With so many easy-to-use features and configurations, clearly Flipper is the ultimate in flexibility.

FlipperPort

The FlipperPort adds a pair of comfortable, lightweight electronic glasses to the Flipper. View full-color, magnified images on your own built-in TVs right before your eyes. A rechargeable battery pack completes the package — enjoy visual independence anywhere.

FlipperPort

Flipper Panel

The Flipper Panel incorporates a 12" LCD screen, with the Flipper attached to a rechargeable battery pack. The battery pack offers over 5 hours of extended use. View full-color, magnified images on a slim, portable screen.

Flipper Panel

Flipper Stand

Flipper product line features include:

- Near, intermediate and distance viewing
- Magnification from 6x – 50x
- 225 degree camera rotation to view images at any distance
- Fully portable; less than 7" high and just over 1 pound
- Connects to any TV in seconds
- Full-color with auto-focus magnification
- Multiple contrast options
- Computer and Laptop Compatible

"I use FlipperPort at school for reading the blackboard and textbooks. I would not be able to keep up with my workload without it."

— Jason Bell, Student
