FarView

Designed for your active lifestyle, Optelec's FarView offers the benefits of distance and close-up viewing in an ultra compact and stylish design. One centralized continuous auto-focus camera allows you to access information around you easily. Simply point the camera towards any relevant information and capture and store images or read information real time. The captured image can be magnified and scrolled through to see every detail of interest.

Use FarView on the road to read street names, departure times, or to select your favourite coffee. Alternatively, use the FarView during a business meeting presentation or at school to capture essential information on the whiteboard. In addition, FarView can also be used as a close-up real time video magnifier.

FarView is ideal for reading. But there is more... it is also an unique reading device for use at school, work, or at home, allowing you to capture complete documents passed around in a business meeting or to read your favourite book or magazine at home while sitting in a comfortable chair. The simple navigation button helps to scroll through any text easily, to auto return to the beginning of the page and to set your own scrolling speed. The built-in menu allows you to enhance reading comfort by selecting one of the six viewing modes, rotating the image and much more.

The FarView can be connected to a VGA monitor or a PC to read images at a more comfortable size or to share pictures with friends.

Capture...

FarView... see up close or from afar.

...essential information.
